## CAREER OBJECTIVE

A Full-Stack Developer with result-driven, customer-focused, articulate and an awesome team player. Offering strong design and product development skills with years of software development experience. Seeking to advance a growing tech carrer where my skills can be utilized and learn more to prove myself an asset for a business.

## WORK EXPERIENCE

### Lead Developer

Xsite Group Inc.

2015 - 2018

As a full-stack developer, I was responsible for the production and maintenance of a web app and mobile app. Its a Nodejs based using Express.js framework and running PostgreSQL as a database. Front-end uses Angularjs, Bootstrap, Angular Material design.

#### Achievements:

My daily work consists of using all these technologies and develop a new feature or fixing an existing bug.

- Lead the development of upcoming features and modules of company's business modal.
- Played an active role in big Migrations of the company like migrating the whole app on to cloud.
- 100% Success rate for the blocked projects.

#### Technologies used:

Angularjs Angularjs Material Design Nodejs Expressjs JavaScript HTML/CSS PostgreSQL

### Junior Software Developer (Co-op)

Xsite Group Inc.

2014 - 2014

As a co-op junior software developer, I was not only responsible for the maintenance of vb.net app but also actively working to migrate features from vb.net app to upcoming Angularjs app under the supervision of the senior developer.

#### Technologies used:

Vb.net MS Access Angularjs PostgreSQL HTML/CSS MySQL

### Freelance projects while studing

Adusus Pvt. Ltd

2010 - 2011

I also did some .net based freelance projects while doing my MSc which are as follow.

- Developed an admin login page and add new recipe page for Singapore based company's website.
- Developed a Barbershop management software which has features like Inventory control, payroll, client's appointments and stock notifications etc.

#### Technologies used:

C#.net asp.net Visual Studio
