CAREER OBJECTIVE

A Software Developer with result-driven, customer-focused, articulate and an awesome team player. Offering strong design and product development skills with years of software development experience. Seeking to advance a growing tech career where my skills can be utilized and learn more to prove myself an asset for your business.

WORK EXPERIENCE

Software Engineer Powersmiths International Corporation (Brampton)

August 2019 - Current

Working as a Software engineer I am responsible for maintaining and building software for the company's various electronic products. My daily work involves bug fixes and re-engineering the current software of various products. After recently completing a java project, I am working on a web application using React and Nodejs, where I will be eliminating the manual handling of files and data by various employees of the company.

Linux environment Java Java Swing framework JavaScript HTML/CSS React Nodejs

Software Developer and Junior Architect Counter Tax Lawyers (Toronto)

April 2019 - July 2019

I worked as a senior full-stack developer and I was responsible for building an improved version of their existing application. In the development process, I was also leading a remote team, which also involved work distribution and proper communication between all team members. I was also responsible for the selection of technology stack and development tools for the firm.

Achievements:

- Redesign the whole database using MySQL and make efficient use of various features like views, indexes, and triggers, etc.
- Made effective deployment strategies changes by separating development, staging and production environments using AWS EC2.
- Improved the overall production by improving team communication and distributing work among various teammates.
- Running production application on a secure protocol ie. HTTPS using NGINX.

Linux environment (AWS EC2) Angular Angularjs Material Design NgRx Nodejs Expressjs JavaScript HTML/CSS MySQL AWS

Lead Developer Xsite Group Inc. (St. Catharines)

2015 - 2018

As a full-stack developer, I was responsible for the production and maintenance of a web app and mobile app. These are Nodejs based using Express.js framework and running PostgreSQL as a database. Front-end uses Angularjs, Bootstrap, Angular Material design.

SKILLS & TOOLS

Frontend

Angular/Angularjs
Angular Material Design
React
JavaScript
asynchronous programming
RxJs
TypeScript
Bootstrap
HTML/CSS

Backend

Node js
Expressjs
PostgreSQL
RESTful API's

Others Skills

Java Heroku Code Review
Git D3.js
Cloud Deployment hammer.js
Async.js RabbitMQ NGINX

Achievements:

My daily work consists of using all these technologies and develop a new feature or fixing an existing bug. And i also

- Lead the development of upcoming features and modules of company's business model.
- Played an active role in big Migrations of the company like migrating the whole app on to cloud.
- 100% Success rate for the blocked projects.
